

MADAWASKA DOORS INC.

"ANY SIZE, ANY DESIGN, ANY WOOD, ANY TIME"

Dear solid wood door admirer,

Thank you for your interest in Madawaska Doors.

We are a Canadian manufacturer of custom designed solid wood doors. Our niche is doors and we hand craft them using traditional mortise and tenon joinery with full thickness panels. Although our customers often order our traditional styles, we encourage them to design their own unique creations. We can create a CAD drawing from a picture, an artist's rendering, architect's drawing or a pencil sketch on a napkin. Once our customer approves the design and the measurements, we select the wood and begin the process. Every Madawaska Door is custom built to exacting standards.

We are proud of our commitment to the environment. We buy our lumber from suppliers who practice reforestation. We recycle all waste materials in our manufacturing facility. Shavings from our planers and shapers are gathered and used for farm bedding and mulch. Our saws are attached to a vacuum system. The sawdust is accumulated and compressed into briquettes which we burn as fuel to heat our plant. Nothing is wasted. Solid wood doors are biodegradable, require minimal fuel to build and are created from a renewable resource.

For three years in a row, 2006 through 2008, we were honoured with a gold medal from the Consumers' Choice awards in recognition of the quality of our doors. Since 1974, the Madawaska Doors team has worked hard to earn the confidence of their customers and vendor partners. We extend a huge thank you to the men and women in millwork departments all across North America who answer the questions and help their customers make informed decisions on which door is best for their needs. We are grateful that many choose Madawaska Doors.

If you sell doors or influence those that buy them and would like more information about Madawaska Doors, please visit our website at www.madawaska-doors.com or contact our
